AN ARKANSAS WOMAN.

She Saved Her Husband from a Murderous Mexican.

is a beautiful valley, where the aroma of the wild sage. wafted from the mountains mingles with the odors of orange and grape, creating an atmosphere of almost intoxicating richness, and where, down through

AR to the wes

mazes of feathery ferns from its lofty front high up among the hoary peaks, flows a brook crystalline in its purity and melodious in its movements, carrying sweetness and verdure to the thirsty vegetation

Let me take you to this valley, called its people "God's country," and ow you some of its beauties. And, in order the better to view it, let me conduct you to a lofty point. Let us ascend by way of Santa Anita canyon, through alternating sage and man-

not in the world. This is the scene, and there in the Cases, Combination Cases. valley, at La Puente, is the spot whereon dwelt the heroic woman of

lived Uncle Billy Madden, a genial country merchant, and his good wife, a lady from Arkansas, of whom he was ever ready to relate some humorously turned anecdote or speak a word of

of life together and, as Uncle Billy was wont to boast, "that Arkansaw woman of his ulways kept things moving along smoothly." She was born and reared near the city of Little Rock and came of a highly respectable family of the middle class, of quite ample means, and was fairly educated and possesses many of the minor accomplishments.

The then young and somewhat adventurous Bill Madden wandered rather aimlessly through the states, having left his home in Ohio with the halfformed intention of locating in some new and unsettled portion of the country. In beating about he found himself Little Rock, where he met his "Arkansaw Woman" and married her. After quite an extended tour of the west in search of a likely place in which to build a home "Uncle Billy" and his bride brought up in the San

Gabriel valley at La Puente. After a short residence in the valley the new couple combined their efforts general merchandise. Here they turned their small stock of goods to gold, and, renewing it constantly, went on gathering in the coin and enlarging their acquired soon after his arrival in the homes after special designs. valley through his fondness for chil-Hundreds of ladies in Alpens were getting rich.

The bulk of their trade was with the

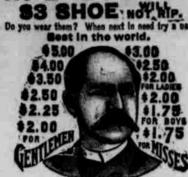

Mexicans, who were in the valley, among them being a number of uglycustomers of the Chavez stripe who ing country, and particularly the "Old right up to date. Mission" close by, anything but a fit habitation for peace-loving people. They would fill up with "owadiente," the native brandy, and bestriding their bronches dash through the highways in a manuer highly threatening to the personal safety of any who might be coming their way, yelling meanwhile like demons and whirling their lassos about their heads until they whistled a shrill accompaniment to the uproar. According to "Uncle Billy" that Arkansaw woman of his often grew uneasy in the presence of these ruffians, and it was her firm conviction that sooner or later there would be trouble at La Puente. He would ridicule her fears and would try to persuade her out of her "notions," as he termed them, but, though she appeared to be calm for the time, she resolved within herself to be ever on the alert for Mexican mischief.

and her fears were not groundless. One day a black-muzzled Mexican entered the store, and glancing about in a listless way inquired the prices of various articles. He seemed to have ample leisure, for, after making a few trifling purchases, he hung about for several hours, exchanging at intervals a few words in Spanish with the storekeeper, in which language the new-comers had become quite proficient. During the stay of the Mexican the

silent partner in the concern ran in from the kitchen close by to get some necessary articles for the culinary department, and seeing him lounging about her fears were excited, and as she departed to resume the preparation of her evening meal she threw a warning glance across the counter at her hus

ann was sinking into the broad bosom of the Pacific, casting lurking shadows toward the Sierras across the valley

THE INVALID'S FRIEND.

nto dreamy repose the sounds of life n the foothills, 'ere the busy housewife began to look for the coming her mate. He seldom varied the tin of his arrival, being regularly on hand to draw up his chair as soon as supper was placed upon the table. But on this occasion he failed to appear, and the expectant woman felt a strange foreboding, and she could hardly re frain from running up to the store to see that all was right. She went often to the door, casting anxious glances to ward the store, but he came not.

Before taking the evening meal from

the store she stepped once again to the

there came to her straining ears a noise

toor, and as she paused on the threshold

resembling a hoarse cry in the dis-tance. Instantly she feit the fears of past months returning with renewed force, and for a moment her heart was faint with apprehension. With her, however, action followed quickly in the wake of thought, and her next move was to secure a large revolver, kept always within easy reach, lart out into the road and hurry toward the store. In a moment she stood upon the threshold, and there, before her, was a sight that sent the blood in torrent back into her heart, paralyzing for a moment her entire being. In the back part of the store her husband crouched, borne over by the weight of the Mexican, who, while clinging to his back, was striving to saw his head from his body with a huge pruning knife, such as are used in the vineyards of that land of the grape. With one swift bound she was beside the struggling men, and placing the muzzle of her revolver against the Mexican's back, essayed to discharge it. She tugged at the trigger with all her strength, but in her haste to rescue her husband she had only partially raised the hammer, and thus was unable to bring it down. Casting the weapon aside she seized the wretch about the neck, and with a man's strength hurled him across the store. Unfortunately for her, he went in the direction taken by the discarded weapon. He sprang for it, and, turning, began firing at her as he retreated backwards from the store. One of the cruel bullets pierced her through from back to breast, and laid her low beside her bleeding and half unconscious hus-

They had lain thus but a few oments when a wagon stopped before the door, and from it descended a neighboring rancher, who leisurely secured his team and entered the store. There being but few apertures for the admission of light, and the sun having by this time sunken almost from sight beyond the world of waters to the west, objects were growing dim, and the man did not notice the two nearly lifeless forms lying just beyond some of the store. Finding no one within he was about to go out in search of somebody to supply his wants, when a low moan reached his ears. Swinging quickly around he started in the direction of the sound and had taken but a step when he recoiled with a loud cry. "Great guns, Billy, what alls ye?"

This was addressed to the first victim, who, with neck and hands streaming with blood sought to raise himself to his feet. Taking in the whole situation at a glance, the rancher assisted the wounded man to his wagon and then in his sturdy arms bore the apparently lifeless body of the woman turned the key, and placing it in his many and beautiful designs. and swiftly led them to the house.

Drawing the wagon close up to the for use or ornament. returning, was about to help the man out when another neighbor drove up, and seeing something was wrong descended and bore a hand in the labor of caring for the wounded. Together the men bandaged them up as best they could, making sure to stem the flow of the life current, after which the newcomer, taking out one of his horses,

come and supply their various wants,

One of them said: "There ought to be

a woman's hand here, and I'll run down for my wife, boys, and then when the doctor comes, we'll investigate this affair." Suiting the action to the word he was off like a flash, leaving the remaining neighbors attentively engaged in caring for "Uncle Billy" and his noble wife. In the course of an hour the man re-

turned with his wife, who immediately set about making the slowly reviving victim of the Mexican's bullet as com-fortable as possible, and before the arrival of the physician, had restored her o perfect consciousness and so far re-uscitated "Uncle Billy" as to enable him to give an accurate description of the Mexican and his murderous attack. As soon as the particulars were given the men retired outdoors and in low tones held a hasty consultation, which ended in the departure of several of them on horseback. In the course of an hour they returned and with them a number of other neigh-bors, and all fully armed and accounted for the road. By this time the moon was shining brightly, and as its beams rested on the faces of the men it rerealed on each an expression of fierce determination that boded no good for the Mexican were they to lay hands on

Everything being in readiness a big fellow from El Monte, who assumed the leadership gave the word, and a dozen mounted men rode silently away across the valley toward the moun-

Upon the physician's arrival the good friends and neighbors left matters in his hands and were overjoyed a few moments later when, after a critical examination of the wounded ones, he assured them that there were no serious results to be feared and that with close attention and careful treatment his patients would in a few days be well on toward recovery from their

painful wounds.

The men who went in search of the would-be murderer returned late in the evening of the following day, covered with dust and showing signs of having

woman" of his. -Frank B. Welch, in Bauner of Gold.

A correspondent of the New York silk and ten dollars worth of Recorder writes to inquire why the fringe. passing bicyclist has so grave a mien ing his own hearse to the cemetery. The sport of wheeling is described in bleycle advertisements as so exhibit and the face of a man awheel constantly wreathed in smiles, his cheeks glowing with the ruddy flame of health and his other remedies and several physicians. why he looks as if he might be pedalsmiles, his cheeks glowing with the ruddy flame of health and his eyes sparkling with the vitality imparted Pa., claims Dr. King's New Discovery has by fresh air and exercise. But these expectations are seldom realized. The average cyclist looks as if he had been sent out to subpoena a coroner's jury J. E. Field & Co's. Drug Store. Large for his own inquest. His gaze is fixed about a mile and a half up the road, his lips are set and the corners of his mouth drawn down until his facial expression is acmixture of grim determination and utter despair.

Our correspondent wants to know why this is thus, and the query is a natural one. It may be answered, Yankee fashion, by another question: Is it not a fact that the average American always makes a grim and serious business of his recreation? Is it not a fact that he seldom smiles (in the liberal sense of the word) when he is alone?
Is it not true that even when he sallies forth for gregarious enjoyment, as it were, on lakeside picnic or distant exsense of the word) when he is alone? cursion bent, he makes harder work of it than having or harvesting? Is it not a fact patent to every good observer that there is too much deadly earnestness and too little laughter in our American life, and is it not true that many of us are never so miserable as when we are pretending to have a good

Then why wonder at the solemn phiz of the passing bicyclist? If we find difficulty in smiling at a picnic, how can one of us be expected to grin when Is a new discovery for the prompt, per he is alone on two wheels with an un-stable equilibrium to look after?

SHOOTING AT ICEBERGS. An Expensive Amusement Proposed the New American Navy.

It has been suggested that the men

taugs were worn-looking and the men

of extreme weariness, yet they seemed

to wear an air of triumph, as they alowly rode up to the home of "Uncle

Billy" and dismounted before the door. One of the neighbors in attendance

upon the wounded people came out as they were tying up their horses, and eagerly inquired if they had captured

the Mexican, and was answered by one

of the horsemen with: "Did we get him? Well, I kinder guess we got him,

eh, pard?" turning to another of the

riders. "Yes," replied the one ad-

dressed. "He's an awful still greaser

now. He ain't likely to do any more

cuttin' er shootin' round these diggin's,

entered the house, and while partaking

mselves presented the appearance

of war of the great navies should be employed in the destruction of the icebergs of the north Atlantic. According to this plan the bergs are to be bom-barded with great shelfs, which, penetrating deep into the great ice and exploding there, will shatter them to pieces. There is no doubt that this would be a far more profitable expenditure of ammunition than the uses for which it is designed, says Scribner's Magazine, for any target is better than the dear bought frame of man or the products of his skill of hand and mind, but it is more than doubtful if the end could be obtained in this way. In the first place, to accomplish the desired result it would be necessary for the men of war to watch the exit of Baffin's bay in the springtime, and break up the bergs into relatively small bits, so that they would no longer float with their bases in the deep southward setting current, but, would drift with the floe ice. To do this with several hundred great masses, averaging probably at least one thou sand feet in cube, would require an enormous expenditure of money. Including the wear and tear of guns, the shells from the great modern ordnance cannot be fired at a less cost than five hundred dollars for each shell, and it would probably require many hundred rounds of ammunition to break up a single berg. It would not at all serve the purpose to rend the ice to pieces in the midatlantic district, for there the fragments would float about and multiply the dangers of navigation. Such work, if done, would make that region nearly impassable for a portion of the year, though from the readier melting of thelice the trouble would not endure so long. On the whole this interesting project does not seem prac-

Who was the Kleptomaniac?

Two well-dressed women, whose kinship could be seen at a glance, and surrounded the pool crying eager entered a shop the other day and ly: "Where, where is he?" And he was took seats at the side counter. The der water and that concealed by the assistant had scarcely commenced tangled bushes which overhang the his weather report when one of the women said:

ered the Mexican rose up and made a dash for liberty through the bushes, my sister is a confirmed kleptomabut he might as well have attempted to outstrip the wind itself, as the swiftlyflying lasso which whizzed over his closely." brought him to earth with a
